NCP Coating Stripper

NATIONAL CONCRETE PRODUCTS

STRIPPER & COATING REMOVER

NCP COATING STRIPPER IS AN INDUSTRIAL STRENGTH STRIPPER THAT REMOVES ALL TYPES OF COATINGS AND ACRYLIC SEALERS FROM ALL CONCRETE SURFACES. A NON-FLAMMABLE STRIPPER WITH VERY LOW ODOR MAKES NCP COATING STRIPPER GREAT FOR INTERIOR USE.

PRODUCT HIGHLIGHTS

- **Non-flammable formula:** NCP Coating Stripper is completely non-combustible and much safer to use indoors than any xylene-based coating remover.
- **Fast action:** NCP Coating Stripper will penetrate and soften the acrylic coating in 20 to 30 minutes so that it can be scraped or pressure flushed off easily. Heavy coatings may require two treatments.
- **No neutralizing necessary:** NCP Coating Stripper contains no acids or harmful reactive components. Just rinse it off and let the floor dry.
- **Economical:** The fast acting NCP Coating Stripper formula means less labor and less time wasted. This saves money.
- **Stable in storage:** Stored in its original container, NCP Coating Stripper remains stable for long periods of time.
- **Available in 1 gallon and 5 gallon.**

USES

NCP Coating Stripper is used to strip off old acrylic sealer where ground-in soil makes the area look dingy. It can also be used to remove the sealer where a color change is desired.

QUICK LOOK:

Type: Nonflammable, water based coating remover

Toxicity: Harmful if swallowed

VOC's: ~2 lbs/gal.

Flammability: Non-flammable

Composition: Biodegradable surfactants, citrus terpenes and non-chlorinated solvents in an aqueous base

Color: Orange

Odor: Slight citrus

Coverage:

**Coverage rates may vary depending on porosity, texture, application method and prior sealer application. Excess buildup should be avoided.*
